**Lencor**  
Technology

as an introduction to Lencor Technology, for a limited time only we are offering an opportunity to upgrade your existing ApplicationXtender software system with key process automation software tools, at a reduced package cost. These tools will turn your current AX Content Management into a central hub for electronic businesses processes, while housing and securing all information associated with each business process.

### ApplicationXtender Promotional Upgrade includes

- software
- support
- implementation
- configurations
- maintenance
- training

**AXO ApplicationXtender** for Microsoft Office 2007 integrates the rich content management functionality of ApplicationXtender into Office business applications.

The product helps to simplify the process of managing documents throughout an organization. Employees can more quickly access information that is stored in documents of almost any type, improving productivity and customer service.

**AX Sharepoint Integration** complements your SharePoint environment with ApplicationXtender document management and added file archiving functionality.

In addition to providing content management tools viewed within SharePoint, ApplicationXtender SharePoint Integration enables you to move content easily from SharePoint to ApplicationXtender repositories. This allows for true file archiving while controlling ever growing MOSS server information and duplication of files.

Included with every ApplicationXtender Business Process Automation (BPA) Upgrade Package:

Lencor Technology provides services to implement, configure, build workflow business logic, train, and integrate your current business files into the ApplicationXtender software systems.

### ApplicationXtender BPA Promotional Upgrade includes

- software
- support
- implementation
- configurations
- maintenance
- training

**File Bridge Xcel for ApplicationXtender** is a middleware software solution which provides automated file capture.

The product watches all server directories. As new files, faxes, and documents from multi-function machines and FTP sites are created on a directory, File Bridge Xcel will capture these files, convert them to a .tif if needed and automate the distribution and delivery to the ApplicationXtender.

**AX Workflow Manager** complements your ApplicationXtender system with electronic workflow automation and performance management tools.

ApplicationXtender Workflow Manager enables users to quickly design and deploy process automation, workflows, integrate with third -party applications, build electronic forms, and centrally manage business processes through key performance indicators (KPI's).

The ApplicationXtender Business Process Automation Promotional Upgrade Package includes:
